Guide to Daily Transfer Limits

Current Standard Daily Transfer Limits
• Bpay - $2,000 • Funds Transfer External - $2,000

Daily Transfer Limit/s	Two Factor Authentication Method
• $0 – $2,000 • Greater than $2,000	• Transaction Authentication Password • Vasco Token

What is a Vasco Token device?

With a single press of the button, your Vasco Token device displays a dynamic one-time password for each time you log into an application, website or network. You enter this one-time password in the login screen of the application.

An additional password, as a second factor of authentication, can also be applied to eliminate unauthorised use if the device is lost or stolen.

The portable Vasco Token device can be carried on your key ring, worn around your neck or simply placed in your pocket or purse.

What is a Transaction Authentication Password?

A Transaction Authentication (TA) Password is an additional password to utilise as a second factor authentication method.

This password must be different to your login password & is required to input when performing any of the five functions listed below.

When am I required to input a second factor authentication password?

You will be required to enter your Transaction Authentication password or Vasco token ID when you perform the following functions within your account in Internet Banking:

1. Add new Bpay Biller
2. Add new External Transfer Payee
3. Change Contact Details
4. Account Personalisation
5. Card Management (Activate and Cancel)

If you have a Vasco token device you will also be required to input a token ID during the login process.

Will there be a cost for a Vasco Token Device?

The cost of a new Vasco token device is $25.00 & a replacement device costs $30.
