ABOUT THE PRODUCT	A variable interest rate personal loan that fluctuates as the market changes with many money saving features such as no monthly account keeping fees and the flexibility to make extra repayments without penalty so you can manage your payments as you choose. Always compare loans with the same features when looking for the best interest rate.
SECURITY	Partial or full security is required meaning that we will require an asset as collateral for the loan. The security required will be assessed depending on the loan amount applied for.
ELIGIBILITY	Available for new and existing borrowers.
CURRENT INTEREST RATE	Interest is calculated daily and charged monthly. When interest is calculated daily, weekly or fortnightly repayments result in less interest being charged to your loan over the course of the loan. This product has a tiered interest rate applicable to the amount borrowed. Please refer to our Lending Fees & Charges brochure for more information.
VARIABLE INTEREST RATE	A variable rate Personal Loan is right for you if you feel comfortable with an interest rate that may change. With a variable rate Personal Loan the interest rate fluctuates in response to changes. What are the benefits? When interest rates are low you can pay your loan off faster and benefit by saving money.
COMPARISON RATE	All lenders must now include "comparison rates" in advertisements for their home loans and personal loans to help consumers understand their total cost – including fees and the interest. Don't rely solely on comparison rates when choosing a loan and beware of their shortcomings. They only take into account assessable fees and interest rates, not the features and how suitable the loan is for your circumstances.
APPLICATION FEE	\$200.00. Please refer to our Lending Fees & Charges brochure for other fees that may apply.
ONGOING ACCOUNT KEEPING FEE	There is no on-going account keeping fees associated with this product. Many financial institutions now charge monthly or annual administration fees on home loans. When comparing the cost of different loans, don't just look at the interest rate, consider the 'total cost of borrowing'.
